

CS506 NAACP Scrum Report – 2

What have we worked on?

- Web-scraping article content from WGBH
- Web-scraping article content from WBUR
- Implementing bidirectional-LSTM in order to add longer memory and robustness while preserving accuracy for the topic model
- Doing research on BERT
- Researching different ways to present the results from our topic modeling
- Refining and making additional improvements on the visualizations of black vs non-black neighborhoods
- Reviewing what has been done previously

What will we be working on next?

- Finish web-scraping article content from both WGBH and WBUR
- Continue working on implementing bi-directional-LSTM
- Continue making improvements on how to visualize our topic modeling results
- Start implementing the topic modeling on the new data set.

Have I run into any issues? Do I need help?

- So far, we haven't run into any specific issues

Have I talked to the client recently? When are we meeting with them next?

- Yes, we have met with our Project manager and client recently and we have also set a new meeting for Friday, October 30.
