Note: Scrum reports may be for a week or for multiple weeks ("sprint") based on project deliverable needs. This report *consists of the entire lead-up to Deliverable 2* (since we had no clients to work with - non-Spark - we planned out our Deliverable work ahead of time).

What we did:
Created presentation.

Finalized the datasets and features that we would be using. Then consolidated all the datasets into one to make analysis easier.

Answered all research questions and wrote up the results in a report for Deliverable 2 (pushed to github).

Wrote README describing all the features in our combined dataset.

What we plan to do:
Begin work on write-up for Deliverable 3.

Challenges:
Figure out what figures and tables are relevant.

Interpreting the results of our analysis. Making sure that our analysis was correct (checking for multicollinearity, etc).
